PROJECT COMPLETION CERIFICATE

PROJECT NAME: "ACCESS PREPARATION WORK CONTRACT BILOUT, DERA ISMAIL KHAN"

Project Start Date: August 16, 2017

Project Completion Date: January 21, 2018

This is to confirm and certify that:

All work components of the above mentioned project for the development of the Dirt Track for easy Accessibility of drilling equipment towards Borehole Locations and platform work has been satisfactorily executed and completed in accordance with the terms and conditions spelled out in the contract document signed on July 25, 2017 between Deep Rock Drilling (Pvt.) Ltd, and Premier Cement Limited (PCL).

Description of Access Preparation Works is as follows:

- Total Number of Boreholes Access Prepared for : 19 Nos.
- Access Dirt Track Meterage : 18222 meters
- Platform Work : 12 Nos.

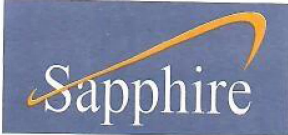

We are of the firm opinion that DRD has technical know-how and logistic expertise & fully equipped with all the necessary heavy machinery etc. Hence, it is recommended that DRD is fully capable to carry out such arduous and highly technical works.

We are confident that DRD will maintain the same level of performance and professionalism that demonstrated during the whole Project.

Sincerely,

Ahmed Jaudet Bilal
Chief Executive Officer

PROJECT COMPLETION CERIFICATE

PROJECT NAME: "DRILLING WORKS CONTRACT AT BILOUT, DERA ISMAIL KHAN"

Project Start Date: August 17, 2017
Project Completion Date: March 4, 2018

This is to confirm and certify that:

All work of this Contract has been satisfactorily completed and is accepted as complete, in accordance with the terms and conditions spelled out in the contract document signed on July 26, 2017 between Deep Rock Drilling (Pvt.) Ltd, and Premier Cement Limited (PCL).

The broad description of completed works is as follows:

Description of completed works

- **Total Number of Drilled Boreholes** : 13 Nos.
- **Type of Drilling** : Angular & Vertical
- **Nature of Drilling** : Dry & Wet
- **Total Drilled Meterage** : 1274.73 meters
 - Angular Meterage : 672.12 meters
 - Vertical Meterage : 602.61 meters

In this regard DRD has performed exploration drilling for Limestone. DRD's accomplishment includes Drilling, Geological Logging & Digitization of Lithologic Logs, and Placement of Core in galvanized Core Boxes & Sample Splitting.

We are of firm opinion that DRD has technical know-how and logistic expertise & fully equipped with all the necessary heavy machinery etc. Hence, it is recommended that DRD is fully capable to carry out such laborious works.

We recommend DRD for all upcoming events related to investigation, exploration and confirmatory works as part of mining & exploration activities.

Sincerely,

Ahmed Jaudet Bilal
Chief Executive Officer
Premier Cement Limited

PROJECT COMPLETION CERTIFICATE

**PROJECT NAME: "LIMESTONE EXPLORATION AT WINDER LASBELA NEAR HUB
BALUCHISTAN"**

Reference: Q-08/DRD/17

Work Start Date: May 25, 2018

Work End Date: July 21, 2018

Type of Work: Wireline Diamond Core Drilling Works

This Certificate to appreciate and Certified that:

All the project work components (Borehole Drilling, lithological logging & Submission of Core boxes) of the above project name has been satisfactorily executed and completed in accordance with the contract agreement to the project proposal and in fulfilment of the technical agreement and financial agreement signed between DRDPL and **Weye Cement**, on February 27, 2018.

All the Drilling activities have been satisfactorily executed and completed, in compliance with the details and work plans which is part of the said technical agreement and financial agreement.

Weye Cement Appreciate for them effort to complete the project as a professional certificated drilling company.

CEO, Yiwei ZHANG

PROJECT COMPLETION CERTIFICATE

Asia Power Limited (APL) is authorized by Sindh Coal Authority, Energy Department (GoS) to perform mining activities at Tharparkar Block-III for Coal Mining and produce electricity through mine mouth power plant. APL has hired Deep Rock Drilling (Pvt) Ltd., as Part of Mining Contractor for drilling of resource confirmation holes for mining pit area and geotechnical holes for measuring stability of formation.

This is to confirm and certify that:

1. All the work components of the above project for developing mine of power station, has been satisfactorily executed injury free and completed in accordance with the terms and conditions spelled out in the contract document, signed on 11-Nov-2015 between Deep Rock Drilling (Private) Limited and Asia Power Limited, within the stipulated time period.
2. The broad description of completed works is as given below:

Project Start Date: 26-Nov-2015

Project Completion Date: 6-May-2016

Serial	Description
1.	Total Number of Boreholes: 31 Boreholes <ul style="list-style-type: none">▪ Resource Boreholes: 27▪ Geotechnical Boreholes: 04
2.	Total Meterage of the Project: 6178.06 meters <ul style="list-style-type: none">▪ Non-Coring Meterage: 3604.99 m▪ Coring Meterage: 2573.07 m

In this regard DRD has performed double tube core barrel drilling for coal resource confirmation holes and triple tube core barrel drilling for geotechnical holes. DRD's work is helpful for APL in designing and resource utilization for open pit mine. Moreover, DRD's work comprises Core Recovery, Geophysical Logging, Geological Logging & Digitization of Lithologic Logs.

DRD has been conducting pleasurable a confirmation drilling in Brownfield of Block-III, Thar Coalfield, Sindh, Pakistan. We are of the firm opinion that this organization is fully equipped with all the necessary heavy machinery and equipment etc. Having technical mining know-how and logistic expertise; hence, they are fully capable to carry out such laborious and highly technical works.

We appreciate DRD's contribution for helping us in designing & preparation of feasibility report for mining of Coal at Block III & III-B, Thar Coalfield.

We recommend DRD for all upcoming events related to investigation, exploration and confirmatory works as part of mining activities of Thar Coal.

Barry Lavin

CERTIFICATE OF PROJECT COMPLETION

This is to certify that M/S. Deep Rock Drilling (Private) Limited have completed the Project (J-03-DRD-2014) entitled “**Geotechnical Investigation at Thar Block-II, Open Pit Lignite Mine**” awarded through a contract signed on 27th September, 2014. The specifications of the project are given as below:

Total Boreholes Drilled	05
Total Meterage Drilled	1063.14m
▪ Non-core Meterage Drilled	16.81m
▪ Core Meterage Drilled	1046.33m
Geological logged Boreholes	05
Geophysical logged Boreholes	05
Samples collected for Analysis	166

We are pleased to further certify that the job was completed by DRDPL to our complete satisfaction and as per terms and conditions of the contract. We also satisfied with the professionalism, cooperation and dedication of their staff. We fully endorse that in the field of exploration, particularly core drilling, DRDPL is fully equipped with latest equipment and work force.

We recommend DRDPL, with full confidence as a national company, for any subsurface exploration (mineral, water resources and geotechnical projects). We wish DRDPL, all the more success in their future endeavors.

Best Wishes.

CMEC Yang Xiaogang

石家莊經濟學院

SHIJIAZHUANG UNIVERSITY OF ECONOMICS

Letter of Certification

This is to certify that:

I, Professor Jia Xuemin, Head of Group of Geoinformation and Prospecting Technology in School of Geology&Geophysics at Shijiazhuang University of Economics, China. I was appointed to undertake third party vetting of Thar Coal Field Resource Reports prepared by Deep Rock Drilling after carrying out exploration works. The reports of Block IIIB, VII, VIII, IX, X, XI and XII of Thar Coal Field covered an area over 676.80 sq km and was based on the results obtained after drilling 304 boreholes by DRD. The reports covered Geological Logging, Geophysical Logging, Geotechnical Assessment and Hydro-geological Studies & Resource Estimation in compliance with the code of USGS and JORC as well.

In order to get high quality data of international standards in the exploration work, DRD has deployed updated technology and modern drilling rigs and equipment. It has maintained a minimum of Coal Recovery of 95% and above. Indeed DRD now plays an important role in the exploration industry and has been recognized as a leading mineral and coal exploration company of Pakistan.

In the implementation of QA system, DRD has performed with proficiency in the technical works. I would also appreciate DRD's policy of professional training of its staff and technical team. It has also established very meaningful and professional relationship with a number of universities and research organization in Pakistan and at abroad. These resources will help DRD in providing much better services to all its clients.

Finally, I honestly feel that DRD will rise to even higher platforms in the exploration industry worldwide through its substantial professional and technical knowledge. We are not hesitating to recommend DRD's capability and services for any future projects.

Professor Jia Xuemin
School of Geology and Geophysics
Shijiazhuang University of Economics

No.SCA-23(1)/293/2010-11
Karachi, April 26, 2012

PROJECT COMPLETION CERTIFICATE

It is to certify that M/S Deep Rock Drilling (Pvt.) Ltd have successfully completed the "Exploration of Coal Resources in Thar Desert, Block-XI, District Tharparkar" with the following salient features:

Salient Features/ Activities	Block-XI
Area Explored	101.46 km
Total Holes Drilled	42
▪ Number of Core Boreholes Drilled	40
▪ Number of Non-Core Boreholes Drilled	00
▪ No. of Boreholes Drilled for Geotechnical Studies	02
Total Meterage Drilled	11974.44 m
▪ Non-core Meterage Drilled	-
▪ Core Meterage Drilled	11974.44 m
Boreholes Geologically logged	42 Holes
Boreholes Geophysically logged	42 Holes
Samples drawn for chemical analyses	371 samples
Hydrogeological Studies	Two Cluster with Aquifer Analysis on software
▪ Production Wells Drilled	6 Wells
▪ Piezometer Drilled	6 Piezometers
Geo-environmental and Socio-economic study of the area	Data collected & carry out demography of the area
Survey of Drilled Boreholes for locations	Marking of Surveyed Boreholes on Topo Sheet 40 K/8,40 L/05 (1:50,000)
Resources Estimation Verification	Vetted by International Consultant
Resource Estimation Standards	USGS & JORC

It certified that the job was completed by DRD to our entire satisfaction and as per ToR, awarded through a contract on Feb 10, 2011. It is noteworthy that USGS & JORC standards were followed in resource estimation. Furthermore, it is recommended that DRD have expertise in mineral, coal, exploratory drilling, cored drilling. DRD, is an exceptional company, one that would contribute greatly to any project. SCA without any reservation recognize DRD as tremendous asset of Pakistan.

GOVERNMENT OF SINDH SINDH COAL AUTHORITY

No.SCA-23(1)2010
Karachi, October 15, 2011

TO WHOM IT MAY CONCERN

Deep Rock Drilling (Pvt.) Ltd., (DRDPL) and Sindh Coal Authority (SCA) signed an agreement on September 27, 2010 for Tender Document No. SCA-23(2) ROB/2010. Under the agreement fifty three (53) Tubewells were to be constructed for supply of water to RO Plant Plants in villages of districts Badin, Thatta, and Tharparkar (Mithi and Umerkot).

DRDPL has constructed fifty-seven (57) Tubewells under the contract. We would like to appreciate their performance in constructing, developing and testing these wells in accordance with the contract agreement. Total depth drilled for these wells is 11081.81 meter.

The well locations were spread over a wide area in four districts of Sindh and over a terrain which ranged from water logged area in Badin and Thatta to inter spaces between the sand dunes in Tharparkar and with different sub-soil formations in each district. In spite of this all the work was completed much ahead of the scheduled completion time and to our satisfaction.

We can say without any reservation that DRDPL has proper professional expertise and suitable experience for executing such a project.

University Road, Karachi,
Pakistan.

Attention: Mr. Ismail Hasan, Team Leader (Operation & Resources)

Dear Sir,

PROJECT COMPLETION CERTIFICATE

This is to certify that a Contract, dated 7th August 2010 of Drilling Services in Block-VI of Thar Coalfield, District Tharparkar, Sindh, Pakistan was awarded to M/s Deep Rock Drilling (Pvt.) Ltd.

M/s Deep Rock Drilling (Pvt.) Ltd. completed the given task as per Terms of Reference (TOR) given to them and maintained professional standards during the duration of the drilling program.

The TOR included the drilling of Core Boreholes, Geotechnical Boreholes & Non Core Boreholes with HQ/HQ3 & Tricone Bits at 27 different locations with a depth ranges from 220 meters to 235 meters (Total Meterage=6157) in Sindh Carbon Energy Limited's licensed area for Coal Exploration in Block-VI, Thar Coalfield, District Tharparkar, Sindh.

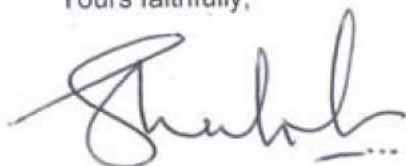

It is worth mentioning of the company's expertise in using triple tube see-through plastic pipes in four numbers of geotechnical holes drilled as per International Standard and maintained highest Core recovery, which was a challenge the company managed to achieve. The drilling program met our current requirement for open-pit mine design.

M/s Deep Rock Drilling (Pvt.) Ltd put in place a professional team and provided necessary equipment for the drilling program that included Wireline Core Drilling Rigs to carry out the task. The company's performance has been evaluated and found to be satisfactory.

Our independent recommendation is that M/s Deep Rock Drilling (Pvt.) Ltd has the capability to drill cored and non-cored boreholes for Mineral Exploration as well as for Hydrogeological Studies and we recommend the company.

We look forward to future co-operation with M/s Deep Rock Drilling (Pvt.) Ltd.

Yours faithfully,

Shahrukh Khan
CEO & Director

TO WHOM IT MAY CONCERN

Subject: Completion of Services by Deep Rock Drilling (Pvt) Ltd, Pakistan for Sindh Engro Coal Mining Company (SECMC)

Dear Sir,

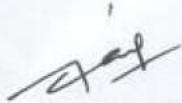

This is to certify that **DEEP ROCK DRILLING (PVT) LTD (DRD)** has completed the scope of work as required under the **CONTRACT** agreement between the **CONTRACTOR** and the **CLIENT**.

Details of the services as outlined in the final TOR for the study include :

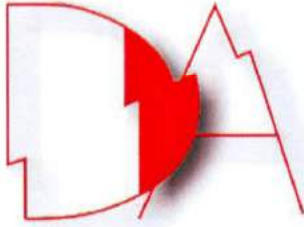

- Drilling of 17 Production and Observation holes. Depth of these drill holes varied from 65 – 250 m.
- 2 Observation holes were cored, from which coal samples were collected and packed. Also from these holes soil samples were collected.
- Pumping tests on 4 Production wells.

The work completed satisfactorily and in time without any major safety or environmental incidents. However, the above does not supersede the Terms & Conditions of the **CONTRACT**.

Dear Mr Hasan

Thank you very much for your performance on the cored boreholes drilled at 3 different locations to a depth of 300m in Sindh Carbon Energy Limited's leased area for Coal exploration in Indus East, District Badin. We are impressed by your hard work in very difficult conditions and extreme weather. This exploration drilling meets our current requirement.

We recognize DRD as having proper professional expertise and suitable Wireline Core Drilling Rigs for carrying out this style of exploration work. The DRD performance has been evaluated and found to be satisfactory.

Our independent recommendation is that DRD has the capability for the drilling of cored and non-cored boreholes, and water wells and can recommend DRD to any quality conscious organization.

We look forward to future co-operation in our projects.

November 08, 1997.

TO WHOM IT MAY CONCERN

Certified that to overcome the problem of water-logging within our factory premises at Hyderabad, M/S DEEP ROCK DRILLING (PVT.) LTD. Karachi, after a detailed discussions and site visit, recommended to construct a deep tubewell of 0.5 Cusecs capacity.

The design of this tubewell including design of construction material and design of pumping equipment for DEWATERING purposes was also provided by the expertise of the company.

Complete construction of the tubewell including, Drilling, Installation of Casing, Gravel shrouding, Development and testing of the tubewell, were carried out under the guidance and supervision of the skilled staff of the company.

The tubewell is working satisfactorily and it is expected that designed DEWATERING procedure will effectively resolve the water-logging problem of the factory premises very soon.

Three Nos. piezometers have also been designed to monitor the lowering of water table around tubewell area.
